SUPPLEMENTARY INFORMATION

I. Abstract

The USPTO is required by Title 35 of the United States Code, including 35 U.S.C. 131, to examine applications for patents. The USPTO administers the patent statutes through various rules in Chapter 37 of the Code of Federal Regulations, including 37 CFR 1.16 through 1.84. Each patent applicant must provide sufficient information to allow the USPTO to properly examine the application to determine whether it meets the criteria set forth in the patent statutes and regulations for issuance as a patent. For example, the patent statutes and regulations require that an application for patent include the following information:

- (1) A specification containing a description of the invention and at least one claim defining the property right sought by the applicant;

- (2) A drawing(s) or photograph(s), where necessary, for an understanding of the invention;
- (3) An oath or declaration signed by the applicant; and
- (4) A filing fee.

The following types of patent applications are covered under the present information collection:

- (1) New original utility, plant, design, and provisional applications;
- (2) Continuation/divisional applications of international applications;
- (3) Continued prosecution applications (design); and
- (4) Continuation, divisional, and continuation-in-part applications of utility, plant, and design applications.

In addition, this information collection covers petitions to accept an unintentionally delayed priority or benefit claim, petitions under 37 CFR 1.47 (pre-Leahy-Smith America Invents Act (AIA)) to accept a filing by other than all of the inventors or a person not the inventor, petitions under 37 CFR 1.6(g) to accord an application under 37 CFR 1.495(b) a receipt date, and papers filed under 37 CFR 1.41(c), 1.41(a)(2) (pre-AIA), 1.48(d), 1.53(c)(2), and 1.53(c)(2) (pre-Patent Law Treaty (PLT) (AIA)) (the particular items covered under this information collection are identified in more detail at Table 1 below).

Most applications for a patent, including new utility, design, and provisional applications, can be submitted through the USPTO patent electronic filing systems (EFS-Web or Patent Center). EFS-Web and Patent Center are the USPTO's systems for electronic filing of patent correspondence and are accessible via the Internet on the

USPTO website. The Legal Framework for Patent Electronic System is available at <https://www.uspto.gov/patents-application-process/filing-online/legal-framework-efs-web>.

The forms in this information collection include: (1) versions of the inventor's oath and declaration forms that were created to comply with the changes resulting from the AIA, e.g., forms AIA/01, AIA/02, etc., (2) pre-AIA versions of the oath and declaration forms, e.g., forms SB/01, SB/02, etc., and (3) foreign language translations of the oath and declaration forms, e.g., forms AIA/01CN, SB/02CN, etc. Items in this information collection that do not have forms associated with them include the petitions and the papers filed under 37 CFR 1.41(c), 1.41(a)(2) (pre-AIA), 1.48(d), 1.53(c)(2), and 1.53(c)(2) (pre-PLT (AIA)).

II. Method of Collection

As set forth in the Legal Framework for Patent Electronic System, available at <https://www.uspto.gov/patents-application-process/filing-online/legal-framework-efs-web>, most of the items in this information collection can be submitted through EFS-Web. The USPTO also will accept submissions by mail, facsimile (except that in accordance with 37 CFR 1.6(d), the items covered under this information collection that may be submitted by facsimile are limited to the petitions and the papers filed under 37 CFR 1.41(c), 1.41(a)(2) (pre-AIA), 1.48(d), 1.53(c)(2), and 1.53(c)(2) (pre-PLT (AIA))), or hand delivery to the USPTO.

Estimated Total Annual Non-Hour Respondent Cost Burden: \$1,205,915,848. There are no maintenance, operation, capital start-up, or recordkeeping costs associated with this information collection. However, this information collection does have annual (non-hour) costs in the form of postage, drawing costs, and filing fees.

Although the USPTO prefers that the items in this information collection be submitted electronically, the items may be submitted by mail through the United States

Postal Service (USPS). The USPTO estimates that the average cost for sending a patent application by Priority Mail Express® 1 day legal envelope will be \$26.50 and that up to 14,440 applications may be mailed to the USPTO, resulting in \$382,660 in postage costs.

The USPTO estimates that the petitions and other papers covered under this information collection, if submitted by mail, will be sent by first-class mail (2 Day Priority Express for a flat rate legal envelope) at an average postage rate of \$8.05. The USPTO estimates that up to 301 petitions and other papers may be mailed per year, thus resulting in \$2,423 in first-class mailing costs.

Patent applicants can submit drawings with the applications covered under this information collection. As a basis for estimating the drawing costs, the USPTO expects that all applicants will have their drawings prepared by patent illustration firms.

Estimates for the drawings can vary greatly, depending on the number of figures that need to be produced, the total number of pages for the drawings, and the complexity of the drawings. Because there are many variables involved, the USPTO is using the average of the cost ranges found for the application drawings to derive the estimated cost per sheet that is then used to calculate the total drawing costs.

The USPTO estimates that total drawing cost is \$601,432,030. The break-down of costs for utility, design, plant, and provisional drawings is broken down in table 3 below.

Table 3: Drawing Cost to Respondents

In this information collection, there is also an annual (non-hour) cost burden in the way of filing fees. The total estimated filing cost for this information collection is \$604,098,735 and is detailed in table 4 below.
